

SCIENTISTS DISCOVER DINOSAUR POTION!

Users describe epic experiences.

by JAY GOULD and HENRY FAIRFIELD

Scientists have recently made a groundbreaking discovery—a formula that temporarily turns humans into dinosaurs. Simply by drinking a small amount of this tasty formula, humans will be able to experience a new dinosaur body for up to an hour. This revolutionary discovery has the potential to answer some of the biggest questions about evolution and the origins of life.

The research team, led by Dr. Jane Smith, began their journey in search of a formula that could potentially turn humans into dinosaurs after reading a long-forgotten book from the 1800s entitled “An Exploration Into the Possibilities of Dinosaur Creation.” The book detailed theories on the possibility of using DNA to create new life forms, and this gave Dr. Smith and her team an idea: Could they use this knowledge to turn humans into dinosaurs?

Dr. Smith and her team studied hundreds of scientific papers and consulted with numerous experts in biology, paleontology,

chemistry, genetics, and more. After years of rigorous experimentation and research, they eventually stumbled upon a formula that could achieve their goal—turning humans into dinosaurs!

Using insights gained from studying living organisms, such as birds, which share some similarities with dinosaurs, Dr. Smith’s team was able to piece together a complex formula which enabled certain human genes to take on characteristics from extinct creatures like dinosaurs! When applied correctly on willing test subjects, this formula causes physical changes such as increased muscle mass along with the growth of reptilian features like scales or horns depending on what type of creature one wishes to become.

Test subjects report amazing experiences and are eagerly lining up to try the potion again and again. Its creators remain focused on ensuring that their incredible discovery remains both safe and fun while they continue conducting experiments

Dinosaur transforming formula is currently being tested by scientists.

aimed at improving their formula even further. One day we might all be able to answer one question: What would it be like if humans could turn into dinosaurs?

COMETS CRUSH RAPTORS

The Comets had a record-breaking weekend as they shut out the previously undefeated Raptors 5-0 in an electric match at the city’s soccer stadium.

All players involved gave outstanding performances, but it was Seth Adams who stole the show with three goals to his name.

The manager of The Comets expressed joy regarding his side’s performance saying: “I’m incredibly proud of our boys today! They put in an outstanding shift against a tough competitor and I’m so glad we emerged victorious.” He also expressed excitement about what lies ahead for them in future matches: “We have shown that we are capable of great things when we work together—now let’s continue this streak!”

The win marks an impressive start for The Comets’ season and provides a boost of confidence moving forward.

METEOR SHOWER TONIGHT

Tonight, a beautiful celestial event will take place in the night sky: a meteor shower. Starting at around 9 PM local time, stargazers can expect to witness an incredible sight as meteors streak across the heavens!

The upcoming meteor shower is known as the Delta Aquarids Meteor Shower. This display is produced by dust grains left behind by the periodic comet, 96P/Machholz. Each year during this time, Earth passes through the dusty cloud of cometary material for several weeks. When these tiny bits of space debris enter our atmosphere at high speed, they burn up and create bright streaks in the sky—otherwise known as meteors!

The best place to view the Delta Aquarids Meteor Shower is in the Southern Hemisphere, near the equator. However, sky

watchers from other regions should also be able to catch some of the action. The peak rate of meteors per hour can reach up to 15-20 meteors.

To get a sense of how many meteors you can expect to see, look for the constellation Aquarius and use it as a guide. The meteor shower will appear to come from this part of the sky.

For optimal viewing, try to find a dark spot away from light pollution. This event should be visible to the naked eye, however binoculars and telescopes may also help enhance your experience.

For those who can't make it out tonight, don't worry! The Delta Aquarids Meteor Shower will continue until August 23rd.

MIDDLE SCHOOL BAKE SALE

The local middle school is hosting a bake sale this week to benefit the school's Paleontology Club. The event, which will take place on Friday, promises to be great fun and an exciting opportunity for students to get creative in the kitchen while raising money for a good cause.

The Paleontology Club was formed by several passionate students who are interested in learning about life from long ago. With the proceeds from this bake sale, the club will be able to purchase supplies for various activities and events, such as fossil hunts and visits to museums.

This bake sale will have something for everyone! From classic chocolate chip cookies and brownies to creative cupcakes with unique toppings and fillings, there will be plenty of sweet treats to choose from. In addition, savory snacks such as pizza rolls and pigs in a blanket will also be available for purchase.

The bake sale is open to the public, so please come out and show your support!

DINO BOOKSALE

Calling all fossil-lovers and Jurassic fans! We at Dino Books are having our final going-out-of-business sale, and it's definitely one you won't want to miss!

We've got discounts up to 50% off on all of our dinosaur books, from encyclopedias about the giants of the past to coloring books for dino-lovers of all ages. Plus, it's your last chance to pick up that limited edition copy of "The Complete Guide to Dinosaur Skeletons" before they're gone forever!

Come on down and check out our huge selection of dinosaur merchandise, from replica fossils and skeleton models to tees, hats, and more. The sale is only going on until our doors close for the last time, and once that happens, these deals will be extinct. So don't wait—stop by Dino Books today and get your hands on some amazing dinosaur goodies! Hurry in before it's too late!

Sincerely,
The Dino Books Team

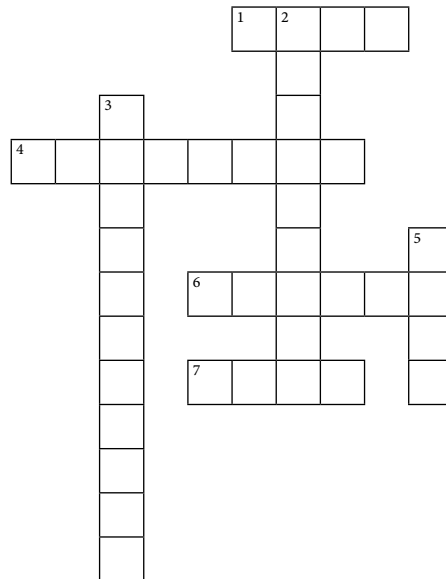

TODAY'S CROSSWORD

Across:

- 1. Hot molten rock that flows from volcanos
- 4. A dinosaur time period; also a dinosaur park!
- 6. A giant space rock that falls to earth
- 7. Dinosaurs and rhinos both have this

Down:

- 2. Large modern reptile that lives in swamps
- 3. Dinosaur with three horns
- 5. King of the dinosaurs

Answers: 1. Lava 2. Alligator 3. Triceratops 4. Jurassic 5. T-Rex 6. Meteor 7. Horn
